- SQL, MongoDB, Firebase, REST, GraphQL

LANGUAGES

- Finnish
- English

ABOUT ME

I'm a software developer, a nerd, and an engineering student at Tampere University of Applied Sciences. My love for video games led me to start game development in 2019, which has guided me toward studying for my dream profession as a software engineer.

WORK EXPERIENCE

Backend Developer (Internship) SUMMER 2025
Tampere University of Applied Sciences

I was responsible for the backend code running on a Raspberry Pi 4, which monitors the status of the student organization's door (open/closed). The program sends this information to a database, from which the frontend retrieves the data.

Programmer (On-the-Job Training) 09/23-12/23
Business Tampere

We developed websites in a four-person team for Pirkkala using WordPress, PHP, HTML, and JavaScript. I was responsible for integrating the Visit Finland DataHub API using GraphQL and for maintaining the technical documentation.

Cemetery Worker (Seasonal) SUMMER 2021
Pori Evangelical Lutheran Parish Union

Newspaper Distributor (Part-time) 06/19-07/21
Suomen Suoramainonta Oy, Pori

EDUCATION

IT Engineer (Software Engineering) 08/2024 -
Tampere University of Applied Sciences

Vocational Qualification in Software Development 01/23-05/24
SASKY Education Consortium

Matriculation Examination 2018-2021
Pori Upper Secondary School

VOLUNTEER WORK

Volunteer 2015-2018
Mannerheim League for Child Welfare
